Notes:

<sup>a</sup> The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Households are identified as unbanked if they answered "no" to the question, "Do you or does anyone in your household currently have a checking or savings account?"

Underbanked households are defined as those households that have a checking and/or a savings account and had used non-bank money orders, non-bank check cashing services, non-bank remittances, payday loans, rent-to-own services, pawn shops, or refund anticipation loans (RALs) in the past 12 months.

The demographic characteristics of a household, such as race, age, education, and employment, are taken to be those of the owner or renter of the home (i.e., "householder"), unless the characteristic is one defined at the household level, such as income or household type.

Differences within groups may or may not be statistically significant.

Refer to 2011 FDIC National Survey of Unbanked and Underbanked Households and FDIC Technical Notes for terms, definitions, and methodological notes. Figures do not always reconcile to totals because of rounding. Differences between groups may or may not be statistically significant.
