Notes:

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

The demographic characteristics of a household, such as race, age, education, and employment, are taken to be those of the owner or renter of the home (i.e., "householder"), unless the characteristic is one defined at the household level, such as income or household type.

Refer to 2011 FDIC National Survey of Unbanked and Underbanked Households and FDIC Technical Notes for terms, definitions, and methodological notes. Figures do not always reconcile to totals because of rounding. Differences between groups may or may not be statistically significant.
