**Notes:**

<sup>a</sup> For comparability purposes, the estimates include households that have an account, but used non-bank check cashing, non-bank money orders, payday loans, rent-to-own, and pawn shops in the last year. The estimates exclude non-bank remittances and refund anticipation loans because the 2009 survey did not ask about non-bank remittances and asked about the use of refund anticipation loans in the last five years as opposed to the last year.

\* Indicates differences that are statistically significant at the 10% level.

Figures do not always reconcile to totals because of rounding.

Data revised September 2012. Refer to 2009 and 2011 FDIC National Survey of Unbanked and Underbanked Households and Technical Notes (link) for terms, definitions, and methodological discussion. Differences within groups may or may not be statistically significant.
