Notes:

This table presents the number of persons residing in households of different banking status. Adults are defined as persons age 16 and above and children are household members under age 16. The estimate of the number of unbanked adults is a lower bound because it is based on the assumption that all adults residing in a 'banked' household are banked. A banked household may contain one or more adults without bank accounts. The estimate of the number of underbanked adults is an upper bound because it is based on the assumption that all adults residing in an underbanked household are underbanked. However, an underbanked household may contain one or more adults that are not underbanked.

Households are identified as unbanked if they answered "no" to the question, "Do you or does anyone in your household currently have a checking or savings account?"

Underbanked households are defined as those households that have a checking and/or a savings account and had used non-bank money orders, non-bank check cashing services, non-bank remittances, payday loans, rent-to-own services, pawn shops, or refund anticipation loans (RALs) in the past 12 months.

Refer to 2011 FDIC National Survey of Unbanked and Underbanked Households and FDIC Technical Notes for terms, definitions, and methodological notes. Figures do not always reconcile to totals because of rounding.
